

INTERIM REPORT 1

Evidence-Based Oral Health Policy for Older People

Protocol number: OHSRC00105

Report on Older People's Oral Health & Treatment Needs

A project jointly sponsored by:

National Council on Ageing and Older People
22 Clanwilliam Square
Grand Canal Quay
Dublin 2

and

Health Research Board
73 Lower Baggot Street
Dublin 2

Project conducted at:
Oral Health Services Research Centre
University Dental School & Hospital
Wilton
Cork

Principal Investigator:
Dr. Helen Whelton

Report compiled by:
Kelleher, V., & Woods, N.

Contents

1. Introduction

1.1. Older People in Ireland

2. Oral Health Profile of Older Irish People

2.1. Parameters of Oral Health

2.1.1. Total Loss of Natural Teeth – Edentulousness

2.1.1.1. Percentage of Edentulous Subjects by Gender & Medical Card Status

2.1.1.2. Percentage of Edentulous Subjects by Fluoridation Status

2.1.1.3. Percentage of Edentulous Subjects by General Health Status

2.1.2. Mean Number of Natural Teeth

2.1.2.1. Mean Number of Natural Teeth by Gender

2.1.2.2. Mean Number of Natural Teeth by Gender & Medical Card Status

2.1.2.3. Mean Number of Natural Teeth by Fluoridation Status

2.1.2.4. Mean Number of Natural Teeth by General Health Status

2.1.2.5. Impact of Gender, Medical Card Status & Fluoridation Status on
Number of Teeth – Multivariate Analysis

2.1.3. Possession of More Than Twenty Natural Teeth

2.1.3.1. Possession of More Than Twenty Natural Teeth by Gender

2.1.3.2. Percentage of Subjects with More Than Twenty Natural Teeth by
Gender & Medical Card Status

2.1.3.3. Percentage of Subjects with More Than Twenty Natural Teeth by
Fluoridation Status

2.1.3.4. Percentage of Subjects with More Than Twenty Natural Teeth by
General Health Status

2.1.4. Possession of Eighteen or More Sound Untreated Natural Teeth (18+ SUNT)

2.1.4.1. Possession of 18+ SUNT by Gender

2.1.4.2. Possession of 18+ SUNT by Gender & Medical Card Status

2.1.4.3. Possession of 18+ SUNT by Fluoridation Status

2.1.4.4. Possession of 18+ SUNT by General Health Status

2.1.5. Denture Wearing

2.2. Parameters of Dental Disease

2.2.1. Dental Caries

- 2.2.1.1. Examination Criteria, Changes Since 1989-90 & Calculation of Mean Number of Decayed, Missing & Filled Teeth (DMFT)
- 2.2.1.2. Mean DMFT & Proportion of DMFT Due to Anterior Caries
- 2.2.1.3. Mean DMFT by Medical Card Status
- 2.2.1.4. Mean DMFT by Fluoridation Status
- 2.2.1.5. Mean DMFT by General Health Status
- 2.2.1.6. Percentage of Total Decay Experience Which Is Attributable to Decayed Teeth, Missing Teeth or Filled Teeth
- 2.2.1.7. Mean Number of Decayed, Missing & Filled Surfaces
- 2.2.1.8. Identifying Risk Indicators Associated with Dental Caries
- 2.2.1.9. Empirical Estimates

2.2.2. Periodontal Disease

- 2.2.2.1. Community Periodontal Index of Treatment Need (CPITN) – Severity: Maximum Scores per Subject
- 2.2.2.2. CPITN – Extent: Mean Number of Sextants per Subject Affected by CPITN Scores
 - 2.2.2.2.1. Maximum Score per Sextant
 - 2.2.2.2.2. All Scores per Sextant
- 2.2.2.3. Loss of Attachment
- 2.2.2.4. Smoking & Periodontal Disease

2.2.3. Other Oral Conditions

- 2.2.3.1. Temporomandibular Joint Dysfunction
- 2.2.3.2. Tooth Wear & Erosion
- 2.2.3.3. Lesions of the Oral Mucosa

2.3. Oral Health Knowledge, Attitudes & Behaviour

- 2.3.1. Knowledge of Fluoride
- 2.3.2. Oral Health Attitudes
- 2.3.3. Oral Health Behaviour
- 2.3.4. Barriers to Dental Care

3. Oral Treatment Needs of Older Irish People

3.1. Assessment of the Treatment Needs of Older Irish People

- 3.1.1. Estimated Need for Any Treatment
- 3.1.2. Estimated Need for Denture Treatment
- 3.1.3. Estimated Need for Conservative Treatment
- 3.1.4. Estimates of Disease Prevalence & Incidence – DMFT Index
- 3.1.5. Estimates of Need for Periodontal Treatment
- 3.1.6. Previously Received Treatments
- 3.1.7. Using Survey Results to Assess *The Dental Health Action Plan*

3.2. Multivariate Determinants of Treatment Need

- 3.2.1. Methods
- 3.2.2. Data
 - 3.2.2.1. Dependent Variables
 - 3.2.2.2. Explanatory Variables
- 3.2.3. Results

3.3. Comparing DTSS Utilisation with Need

- 3.3.1. Descriptive Assessment of Need / Utilisation Relationship
- 3.3.2. Comparing Need with Service Provision: All Medical Card Holders
- 3.3.3. Comparing Need with Service Provision: DTSS Users Only
- 3.3.4. Comparing Need with Service Provision: Dentate DTSS Users
- 3.3.5. Comparing Need with Service Provision: Dentate Regular / Non-regular DTSS Users
- 3.3.6. Utilisation versus Need at Health Board Level: All Medical Card Holders
- 3.3.7. Utilisation versus Need for Periodontal Treatment
- 3.3.8. Summary of Descriptive Analysis

4. Conclusions

5. References
